To drink a pint of hot water before meals is good practice, and those suffering from catarrhai condition of the stomach will find benefit in adding about 16 grains (one-sixth of a level teal spoonful) of baking soda, drinking it an hour before each meal.

When run-down, when life indoors has brought about a stagmant condition in the circulation—most everyone is filled with uric acid—especially is this so of people past middle age. This uric acid in the blood often causes rheupattism, lumbago, swelling of hands or feet, or a hag-like condition under the eyes. Backache, frequent urination or the pains and stiffness of file joints and high incodpressure are size often noticed. Everyone should drink plenty of pure water and exercise in the open air as much as possible I have found that Anuric is an antifole for this uric acid poisson and that it will dissolve the accumulation of mic acid in the body much as hot water dissolves sugar.—Advertisement.
